

**Scheduling & Tasks:** Ditch the whiteboard. Optimize your brew schedule, tank usage, & plan out future brews. It's at your fingertips. Anytime. Anywhere.

**Raw Materials:** Track ingredient availability for grains, hops, and adjuncts.

**Yeast:** Is your yeast healthy to brew? Create yeast genealogy trees to track yeast that is new, pitched, harvested, and propagated.

**Process:** Tired of inefficiencies from paper logs, spreadsheets, or multiple systems of information? Track all Brew, Ferment, Filter, BBT, and Package data. From any device. All in one place.

**Lot Trace:** While brewing, pick the exact lot for each ingredient, to help evaluate losses, landed costs, and analytical quality.

**Packaging Material:** Do you have the right inventory to package what you need? Track depletions, losses, and costs for bottles, cans, and kegs to know what you have on hand.

**Batch Costs:** Want to see how much that batch of beer cost? Run reports on exact dollar values for each brand and batch.

**Sensory & Quality:** Evaluate your beer across custom lab quality metrics, track CIP logs, graph sensory attributes on a flavor wheel, and assess beer true-to-brand profiles.

**Barrel Aging:** Track all cask data individually with beer, adjuncts, and microflora additions. Then, view notes and historical reports to see what happened in every cask that lead to that magical barrel aged blend.

**Packaging Downtime:** Know exactly which packaging machines are stealing your minutes and efficiency.

**Keg Tracking:** Know the history of everything in a specific keg and track individual keg locations using keg serial numbers.

**Sales & Distribution:** Which of your accounts are the hottest and which are slowing down? Run analytic reports on accounts by sales orders, price sheets, and account information.

**Accounting Integration:** Sync Beer30 with Xero and QuickBooks Online for contacts, sales orders / tax invoices, and purchase orders.

**Dashboard:** See all of your data in one place! Task management, brew-filter-pack analytics, daily fermentation profiles, and instant tank snapshots from anywhere in the world.

**Charts:** Are your daily gravities, temperatures, and overall times on par? Recognize issues before they become problems by graphing all process data.

**Reports:** Calculate USA's Brewer's Report of Operations and Australian Excise Tax in 2-clicks!

**Notifications:** Subscribe to real-time text and email alerts to keep you updated & aware of everything happening at your brewery!

**Contacts:** Track your relationships with accounts, vendors, and distributors. Record notes, actions, and metrics.

**Batch History:** Easily reference full histories for batch comparison, from grain-to-glass.
